*Lynx hold-over reticle can be fitted
to any Lynx LX or LX2 model rifle scope,
although it is best suited to scopes that magnify
9x or more like the LX 4-16x42AO pictured here.*

If you have a Lynx LX or LX2 Professional series rifle scope, or are planning on getting one, you may want to consider fitting it with our new hold-over reticle: It has nine hold-over aiming points below the centre cross to provide an accurate means of compensating for bullet drop over 100 to 400 metres without touching the scope. The diamond-shaped aiming points are small and unobtrusive, presenting an uncluttered sight-picture that does not confuse the eye.

Lynx hold-over reticle can be fitted to any LX or LX2 model rifle scope, but because it is most suited to small-game hunting and medium- to long-range shooting it is best fitted to scopes that magnify 9x or more:

Model	Price
LX 3-9x38	R2 750
LX 2-10x38	R2 480
LX 4-16x42	R5 045
LX 6-24x42	R5 300
LX2 4.5-14x40AO	R5 600
<i>(add R450 for hold-over reticle)</i>	

*New scope models coming
end-April:*

LX2 3-9x40	TBA
LX2 4-12x40	TBA
LX2 6-20x40AO	TBA

New scopes can be ordered through your dealer at the prices listed above. If you own a Lynx LX or LX2 scope and want to have this reticle fitted, send it to us via your dealer or directly to Lynx Optics at PO Box 98078, Sloane Park, 2152. We will need the scope for about 5 days and it'll cost R500 to modify.
